

Homeland Security and Emergency Management

Solutions for Mitigation,
Response and Recovery

Mitigation Expertise to Facilitate the Recovery of Resilient Communities

GP Strategies® mitigation staff members stand ready to provide assistance and expertise to municipalities and eligible entities in project identification, sub-application development, programmatic/policy guidance, planning, grants management, monitoring, and closeout of activities.

Local hazard mitigation (HM) initiatives are important. Because they are put in place before a disaster, they reduce vulnerability so that communities can recover more quickly and be better protected from the impacts of a disaster when one occurs.

GP Strategies strategically implements mitigation initiatives that break the cycle of damage, reconstruction, and repeat damage. Recognizing that stronger, more resilient communities reduce the impacts of disasters, resulting in recoveries that are less costly, the Federal Government invests in HM initiatives by providing grants to assist communities to implement HM projects, both pre- and post-disaster.

National Preparedness System/ National Response Framework

- Prevention
- Protection
- Mitigation
- Response

National Disaster Recovery Framework

- Critical Infrastructure
- Housing
- Health and Human Resources
- Economic and Community Development
- Natural and Cultural Resources

Hazard Mitigation Grant Program (HMGP)

GP Strategies takes a proactive approach using extensive knowledge of industry best practices and lessons learned when implementing and administering an HMGP. Our experience and knowledge improve your agency's capability to effectively implement, manage, and close out this program, which provides immediate and long-term benefits to the community.

- 1 Evaluate mitigation and response strategies and status of an HM plan
- 2 Review critical infrastructure and history of damages
- 3 Analyze state/commonwealth priorities for parallel implementation
- 4 Meet with decision-makers and stakeholders to achieve concurrence
- 5 Develop cost-effective, eligible, priority-ranked projects
- 6 Successfully implement an HM program and projects, and manage to closeout

Recovery and Resilience

By integrating the corporate core competencies of training and performance improvement, we support capacity building within organizations and communities. We leverage our corporate capacities in engineering and project management to expedite reconstitution of services.

Program and Project Management

Project controls, procurement, design, and construction management—whatever the scale of project, from concept to occupancy, our team integrates federal grant requirements into the construction process so you don't have to worry about losing funding.

Capacity Building

We provide local organizations and agencies with the ability to ramp up and contribute to disaster recovery efforts. As we map out the critical skills and knowledge necessary, we focus on options to build capacity through hiring, partnering, and contracting.

Grant Development and Administration

Recovery managers who are ready to immediately begin coordinating grant development efforts are positioned across the country. Recovery administrators organize and process data so federal grants can be expedited.

Technical Assessment

Recovery specialists with expertise in civil and structural design, MEP engineering, and cost estimating are on call to deploy as part of damage assessment teams.

Risk, Regulatory, and Compliance

GP Strategies develops governance, risk management, and regulatory compliance strategies to keep pace with new legislation and stakeholder expectations.

Consulting Services

Recovery involves all aspects of a community, so a variety of experience is required. We pull from a broad range of resources to supply the necessary expertise.
